Most people come to Christ because of relationships – not events.

Every one of us – regardless of age, culture, ethnicity, or economic status – live in a world where we participate in relationships. More than 75 percent of individuals who come to know Christ have experienced salvation as a result of a direct relationship.

Oikos is a Greek word that is found many times in the New Testament that can provide tremendous insight and revelation to our prayers and evangelism. Oikos defines an individual’s primary base of relationships and relational sphere of influence. This includes one’s family, friends, neighbors, co-workers, and most frequent contacts.

We can become more intentional in focusing our prayers for salvation, transformation, and wholeness on behalf of those with whom we already have personal relationships!

Use this simple worksheet to help you clarify who is in your oikos:
